Ok. I am talking with William at 1:30 pm. I will follow back up with you regarding whether I think William should be on the call. I am free after 12:00 pm tomorrow to talk with Hart. Let me know your availability. I am a little under the weather today so I am not going to check email until after I speak with William.

Thanks

T

I don't know if it's imperative that funds center be on call. Are we having call Wednesday with Colonial? I guess we can discuss. If Colonial is interested in discussing applicability of NCP section related to cooperative agreements, we may feel capable of addressing that ourselves. Or it may be beneficial to have fund center input that cooperative agreement not necessary to pass project to TDEC.

I talked to Hart briefly after my email. The issue is State limits on liability. Not sure how PRFA helps with that. It's the same bill coming from funds center.
